Software Company • Chennai, India

POS • Inventory • Task Management
Queue Management • Banquet Management

Prepared by Grovit AI

1. Executive Summary

Grovit AI is a software company focused on developing practical and scalable technology solutions for businesses.

Our current software portfolio consists of POS, Inventory, Task Management, Queue Management and Banquet Management. The remaining ERP modules are still under development.

Grovit AI has already developed products and started working with customers, including Lelaban and a CMS advertising company. We are now looking for a strategic business partner to help expand our customer base, strengthen business operations, improve customer support, and enter new markets.

To support this expansion, Grovit AI is seeking a total partnership contribution of **₹5,00,000**: **₹3,00,000** covers app fees for one year for the five current apps, and **₹2,00,000** is the investment for 5% equity in Grovit AI. Any other apps may be subject to different pricing. One year of software support for the covered apps is also included at no additional software-support cost, subject to the agreed scope and terms.

Our primary growth targets are 100 projects within Year 1 and 500 projects within 3 years.

2. About Grovit AI

Grovit AI was established with the vision of building technology that makes business operations simpler, more efficient, and more connected.

Rather than focusing on a single software product, Grovit AI is developing a portfolio of business solutions that can address different operational requirements.

Our vision is to create an integrated business technology ecosystem covering:

POS → Inventory → Task Management → Queue Management → Banquet Management

3. Products & Services

Current App	Purpose
POS	Sales, billing and transaction management.
Inventory	Stock and inventory management.
Task Management	Task assignment, tracking and coordination.
Queue Management	Customer queue and service-flow management.
Banquet Management	Banquet booking and event management.

ERP Modules Under Development

The remaining ERP modules are still under development. Biometrics, the Financial Accounting app and other ERP modules are planned to be completed in the coming months.

The one-year app-fee coverage applies only to the five current apps listed above. Any other apps, including future ERP modules, may be subject to different pricing and are not automatically included.

4. Proposed Partnership

Total Partnership Contribution: **₹5,00,000**

Component	Amount & Coverage
One-Year App Fees	**₹3,00,000** - one year for the five current apps listed in Section 3
Equity Investment	**₹2,00,000** - investment for 5% ownership in Grovit AI
Total Partnership Contribution	**₹5,00,000** - includes covered app fees and equity investment

Equity: 5% ownership in Grovit AI against the **₹2,00,000** investment component. The **₹3,00,000** app-fee component is included in the **₹5,00,000** total contribution.

Partner Contribution: Business support, customer support, business development, customer acquisition, market expansion, and strategic business relationships.

The detailed responsibilities, rights, and obligations of the partner will be defined through a formal legal agreement.

5. Partner Benefits

5% Equity

The partner will receive a 5% ownership stake in Grovit AI against the **₹2,00,000** investment component, subject to the final legal and shareholder agreement.

One Year of App Fees Covered

The total **₹5,00,000** contribution includes **₹3,00,000** covering one year of app fees for POS, Inventory, Task Management, Queue Management and Banquet Management. Any other apps, including future ERP modules, may be subject to different pricing.

One Year Software Support

The partner will receive one year of software support for the covered current apps at no additional software-support cost, subject to the agreed scope of support.

Participation in Future Growth

The partner will participate as an equity holder in the future growth and development of Grovit AI.

6. Business Expansion Strategy

Direct Sales

Build a dedicated sales process to approach businesses that require POS, Inventory, Task Management, Queue Management and Banquet Management.

Business Partnerships

Develop partnerships with advertising companies, business consultants, technology companies, local business networks, and industry partners.

Recurring Revenue

Develop subscription-based software packages and support plans to create predictable recurring revenue.

Cross-Selling

Sell multiple current apps to the same customer - for example: POS → Inventory → Task Management. Additional apps may be subject to different pricing.

7. One-Year Growth Target

100 PROJECTS

To achieve this, the company will focus on increasing sales activities, building customer relationships, developing partnerships, improving product quality, strengthening customer support, expanding the sales network, and increasing brand awareness.

8. Three-Year Growth Target

500 PROJECTS

Over the next three years, Grovit AI aims to expand beyond its current Chennai market and establish a larger customer base.

- ERP expansion (remaining modules under development)
- POS solutions
- Inventory
- Task Management
- Queue Management
- Banquet Management
- Subscription software
- Business partnerships
- Customer referrals
- Geographic expansion

9. Revenue Growth Opportunity

Grovit AI has multiple potential revenue streams rather than depending on one product.

Current App	Potential Revenue Sources
POS	Software subscription; implementation; support
Inventory	Software subscription; implementation; support
Task Management	Software subscription; implementation; support
Queue Management	Software subscription; implementation; support
Banquet Management	Software subscription; implementation; support

10. Competitive Growth Advantage

Grovit AI's approach is based on offering multiple business solutions under one technology ecosystem.

Instead of a customer needing separate vendors for different requirements, Grovit AI aims to provide multiple solutions through one company.

POS → Inventory → Task Management → Queue Management → Banquet Management

This creates opportunities for long-term customer relationships and cross-selling.

11. Three-Year Vision

Our long-term vision is to establish Grovit AI as a scalable software company serving businesses through an integrated technology ecosystem.

Target: 500 Projects in 3 Years

We aim to build a company with a strong customer base, multiple recurring revenue streams, scalable software platforms, strong business partnerships, dedicated sales and support operations, and expansion into multiple markets.

12. Partnership Summary

Particular	Proposal
Company	Grovit AI
Industry	Software / Technology
Location	Chennai, India
Current Products	POS, Inventory, Task Management, Queue Management and Banquet Management
ERP Development	Biometrics, Financial Accounting and other ERP modules are under development for the coming months.
Total Partnership Contribution	**₹5,00,000** (includes app fees for one year)
One-Year App Fees	**₹3,00,000** - one year for the five current apps
Other Apps	May be subject to different pricing; not automatically included in one-year coverage.
Equity Investment	**₹2,00,000** - investment for 5% equity
Equity Offered	5%
Partner Role	Business & Support
Software Support	1 Year for covered apps, subject to agreed scope
Year 1 Target	100 Projects
Year 3 Target	500 Projects

13. Partnership Vision & Closing Statement

We are not looking for a partner solely as a source of capital. We are looking for someone who can become part of Grovit AI's growth journey.

The partnership will be based on: Investment + Business Support + Customer Network + Growth

With the right partnership, Grovit AI aims to accelerate customer acquisition, strengthen its products and support operations, expand into new markets, and build a sustainable software business.

Grovit AI has reached an important stage where our focus is shifting from product development toward business expansion and customer acquisition. With our existing products, initial customers, technology team, and expansion strategy, we aim to build Grovit AI into a larger software solutions company.

We are seeking a strategic partner who can contribute a total of **₹5,00,000** and actively support the company's expansion. This total includes **₹3,00,000** for one year of app fees for the five current apps listed in Section 3, and **₹2,00,000** as the investment for 5% equity in Grovit AI. Any other apps may be subject to different pricing. One year of software support for the covered apps is also included at no additional software-support cost under the agreed terms.
